

DECLARATION AND POWER OF ATTORNEY FOR U.S. PATENT APPLICATION

(X) Original () Supplemental () Substitute () PCT () DESIGN

As a below named inventor, I hereby declare that: my residence, post office address and citizenship are as stated below next to my name; that I verily believe that I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural inventors are named below) of the subject matter which is claimed and for which a patent is sought on the invention entitled:

Title: OPTICAL DISK APPARATUS

of which is described and claimed in:

- () the attached specification, or
 () the specification in application Serial No. NEW, filed , and with amendments through , or
 () the specification in International Application No. , filed , and as amended on (if applicable).
 (X) letters patent number 6,298,019 granted on October 2, 2001 and in the attached specification and attached preliminary amendment for which I solicit a reissue patent.

I hereby state that I have reviewed and understand the content of the above-identified specification, including the claims, as amended by any amendment(s) referred to above.

I acknowledge my duty to disclose to the Patent and Trademark Office all information known to me to be material to patentability as defined in Title 37, Code of Federal Regulations, §1.56.

I hereby claim priority benefits under Title 35, United States Code, §119 (and §172 if this application is for a Design) of any application(s) for patent or inventor's certificate listed below and have also identified below any application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

COUNTRY	APPLICATION NO.	DATE OF FILING	PRIORITY CLAIMED
Japan	07-191680	July 27, 1995	Yes
Japan	08-081245	April 3, 1996	Yes

A Statement of at least One Error and Notice of Broadening Reissue Application

I verily believe that the above-identified original letters patent is partly inoperative by reason of claiming less than I had a right to claim. Notice is hereby provided that this reissue application is a broadening reissue application filed within 2 years from the issue date of the above-identified original letters patent. As a statement of at least one error, independent claim 1 has been amended via the concurrently submitted Preliminary Amendment so as to correct an inadvertent error made during prosecution by deleting the limitation of "a focus control means for detecting a focus condition of the light beam irradiating the information faces on the basis of an output signal from said light detecting means, driving said moving means on the basis of the detection signal, and controlling the light beam so that the focus condition of the light beam becomes a predetermined focus condition" and instead properly adding the intended limitations of "a focus condition detecting means for detecting a focus condition of the light beam irradiating the information faces on the basis of the digital signal from the light detecting means;" and "a focus control means for driving said moving means and controlling the light beam so that the focus condition of the light beam becomes a prescribed focus condition on the basis of an output signal from said focus condition detecting means;"

All errors being corrected in this reissue application up to the time of filing the present declaration arose without any deceptive intention on my part or my behalf.

I hereby claim the benefit under Title 35, United States Code §120 of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code §112, I acknowledge the duty to disclose information material to patentability as defined in Title 37, Code of Federal Regulations, §1.56 which occurred between the filing date of the prior application and the national or PCT international filing date of this application:
